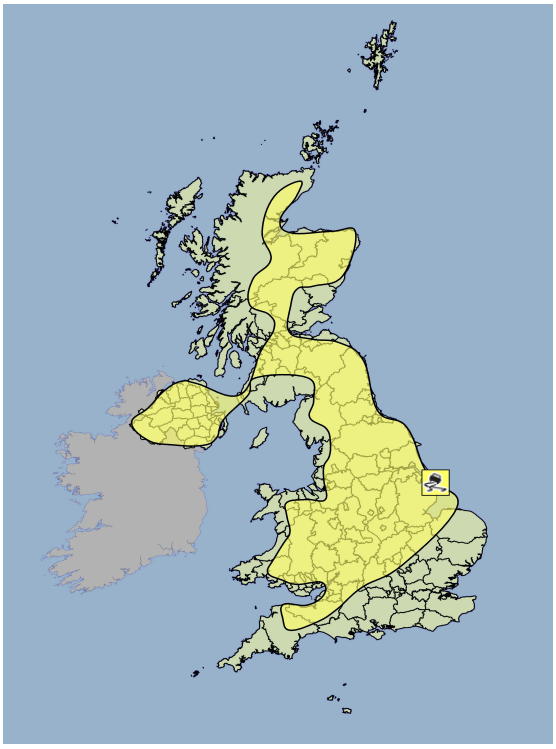
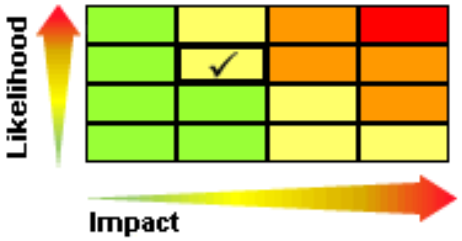
National Severe Weather Warning Service





Chief Forecasters Assessment
Clear skies will allow temperatures to fall below freezing in many areas on Sunday night. This leads to a risk of icy patches on untreated surfaces, especially where the ground remains wet or damp from recent rainfall, and also where showers continue to occur overnight. In addition, wintry showers may lead to small accumulations of snow across the high ground of Wales and Scotland.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **22:00 on Sun, 09th Feb 2014** until **10:00 on Mon, 10th Feb 2014**

Icy stretches may form on untreated surfaces on Sunday night. The public should be aware of the potential for some locally difficult driving conditions.
